Achievements

CAREER OBJECTIVE

Seeking a job role as a System engineer. Have a skills in building responsive websites, single page application. Also flexible to learn new technologies. Looking for opportunities to start my career as a developer.

EDUCATION

University College Of Engineering BIT Campus -Trichirapalli

Bachelor Of Engineering (Computer Science Engineering) 2016-2020

Little flower higher secondary school - kumbakonam 2014-2016
Higher Secondary Education 72

Little flower higher secondary school - kumbakonam 2014
SSLC 80

PROJECTS

HYBRID MOBILE APPLICATION AND INTEGRATION

Developed a single application by using React Native and JavaScript that handle both IOS and Android OS.

The performance of framework increased due to no need to convert according to the OS such as GPU frequency, CPU load, Memory usage and Power consumption.

EXPERIENCE

PROJECTS

FOOD ORDER WEBSITE: link :)

<https://ashok864.github.io/Foody/>

I have developed a food ordering application in which you can easily order food online.

By looking at the types of popular dishes on this website, you can order online. And you can see what special products are available today you can also see how the customer's reviews.

Been a class representative for 3 years at college. Event coordinator in the department symposium.

Interests

Web Developing

Designing

Reading books

DASHBOARD APPLICATION : link :)

<https://ashok864.github.io/Ashok864dashboards/>

I have developed the Dashboard single page application. In this application you can see how many members are working in a company, how many projects are going on in that company and how much is the company's annual income.

TRANSPORTATION SERVICE WEBSITE: link :)

<https://ashok864.github.io/Ashok864Transportservices/>

Now I am developing a project on transportation services website. Here you can see the list of import and export products in the company. Then you can order the product. Finally you can see that connection of companies and check it customers reviews.
